

Simulations for Harmon & Nuismer

December 19th, 2016

Summarizing results from simulations with fixed Ntip and depth

```
## logLik for small trees' fitting  
summary(results.small$llik.fit)
```

```
##      Min. 1st Qu.  Median    Mean 3rd Qu.    Max.  
## 30.65  57.54  63.49  62.91  70.44  87.75
```

```
## logLik for large trees' fitting  
summary(results.large$llik.fit)
```

```
##      Min. 1st Qu.  Median    Mean 3rd Qu.    Max.  
##  6.401  11.860  12.930  12.480  13.150  15.280
```
